ARIALUCE® è un avvolgibile in alluminio coibentato, a foro largo. La sua caratteristica fondamentale consiste nella particolare asola lunga presente nella stecca, che permette, ad avvolgibile abbassato, una significativa aerazione e illuminazione dell'ambiente, a differenza dell'avvolgibile tradizionale. La dimensione del foro (altezza 5,5 mm, larghezza 180 mm), nettamente superiore a quello tradizionale (altezza 2 mm, larghezza 17 mm) favorisce, a tapparella abbassata, **l'agevole riciclo dell'aria all'interno dell'abitazione e, nel contempo, l'entrata della luce solare.**
