

AVVOLGIBILE IN **PVC** MODELLO **TORINO**

BLOCCAGGIO STECCA

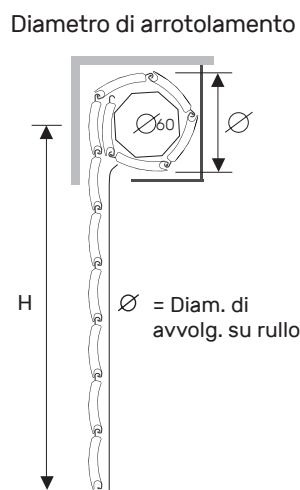

L'avvolgibile in pvc **Torino** (peso specifico standard di circa kg. 4,000/mq) è realizzato con stecche auto-aggiacianti (a doppia parete e con intersezioni di irrigidimento interni) che misurano 13 mm di base e 55 mm di altezza. Il profilo è dotato di un fermo laterale "antisfilamento" che serve a bloccare le stecche. Normalmente, per larghezze e colori particolari, è consigliato l'utilizzo di rinforzi in ferro ad H. Questa tipologia di avvolgibili rispetta i requisiti previsti dalla normativa UNI EN 13659:2009.

Per un corretto funzionamento (evitare i problemi di inarcamento), corredare SEMPRE la tapparella con il TERMINALE IN ALLUMINIO o TERMINALE IN FERRO.
